Using Your Section Tabs

Nine tabs matching the planner edition's sections: Begin, Prepare, Release, Clarify, Embody, Activate, Act, Integrate, Notes. Right-side and left-side sets are included, in full color and a printer-friendly outline version.

- 1 **Print**
Cardstock recommended, 100 percent scale. Choose the color or printer-friendly pages, right- or left-side sets to taste.
- 2 **Cut**
Cut each tab out along the solid lines; the small horizontal guide under each tab marks a clean straight edge.
- 3 **Fold**
Fold on the dashed center line so the label shows on both faces, and slip the fold over the outer edge of the section's first page.
- 4 **Attach**
Double-sided tape or a glue stick inside the fold holds them; repositionable tape lets you rearrange later.
- 5 **Laminate (optional)**
For a deck that lasts years, laminate the printed sheet before cutting, then cut and fold; score the fold line lightly first.

Tabs extend past the page edge by design; trim the depth to suit your binder. Punch positions vary between binders, so tabs deliberately avoid the ring edge. Personal use only. © 2026 GlowHausDigital.
